Styling

# Bullet chart styling

Font styling expanded to more charts

- Chart specific font styling for Bullet
  - Axis title
  - Axis value
  - Value label
- Set font family, size and color per chart

Bullet chart Styling — Reset all

General | Chart

Axis title
Graduate, fantasy
12px

Axis label
Graduate, fantasy
14px

Value label
Graduate, fantasy
11px
☑ Auto contrast color

KPI styling

Font styling expanded to more charts

- Chart specific font styling
  - First and second measure
  - Title and value

- Set font family, size, weight and color per chart

- Note that conditional colors have a special section

Font updates

Improving font handling

- Font preview in drop down

- Open-source fonts

- Same fonts everywhere on screen and in printing

- Old dashboards will look the same, new font only if actively going in and changing.

- You can use your own font, make a custom theme and include your font.

Theme fonts	Theme
Source Sans Pro, sans-serif	✔
All fonts	Default
Abril Fatface, serif	
BANGERS, FANTASY	
BEBAS NEUE, SANS SERIF	
EB Garamond, serif

Qlik

Filter pane updates
## Confirm selection and collapse settings

- Option to select directly, no need to confirm the selection

- Control when to collapse: Always, Never, Auto

- Useful for controlling style behavior and especially when using grid mode to make a row of buttons.

- Tips for a nice-looking button bar:
  - Uncheck show selection bar
  - Switch off sort by state
  - Turn on compact view
  - Center align text
  - Switch off title
  - Switch off search

Line

## Add dividers and decorations to your dashboard

- Useful for
  - Separating and grouping content that belongs together
  - Creating bespoke dash boards
- Features
  - Line width
  - Line color
  - Vertical or horizontal
  - Line style, solid or dashed
- Works best in non card themes and the new coming layout container.

Rich text chart

Add formatted text and ad hoc tables

- Useful for
  - Measure tables
  - Formatted output
  - Controlled text

- Features
  - Font family, size, color, style
  - Paragraph list, bullets
  - Tables with columns and rows
  - Border color and width
 - Expressions, color by expression

Straight Table

Straight table improvements
Multi page PDF download, monitor, snapshot

- Straight table in visualization bundle incremental updates

- Other
  - Monitoring charts
  - Snapshots
  - Download as image

- Multi page PDF (SaaS Only)
  - Download up to 50 pages
  - Totals included, top or bottom

Other

Line chart show conditions
Show dimensions and measures based on expressions

- Bar chart in August, now also for the Line chart

- More control to app developers

- Toggle dimension and measures using show condition expression

- Great for tailoring the bar chart using variables and user switches

- Also for alternative dimensions and measures

Show dimension if

vDim='Geo' fx

Show measure if

vMeas='Sales' fx

Qlik Q

Update bookmark
Update selection in bookmark

- New option for bookmark:

- *"Update selection"*

- Many customers have been asking for a way to edit bookmark.

- Convenient, no need to delete and create new bookmark just because the selection should change.

- Note, bookmarks can be made dynamic, check out Qlik Help for more info.
